

POC

BodyArmor - Joint Protectors

Thank you for choosing POC safety products. Correctly used and cared for, it will keep you better protected and satisfied for many years to come.

Applications

POC Body Armor and accessories are designed specifically for skiers and cyclists. It is intended to give limited protection in the event of a minor fall or collision with an obstacle. It will not protect you against twisting or compression injuries or other extreme occurrences.

CE symbol

The CE symbol on the safety equipment demonstrates the product's conformity with European regulation 89/686/CEE (and later updates), which requires the use of the CE symbol.

Explanation of labeling

CE: European conformity symbol
S1: Product identification number
EN1621-1:2012: Technical reference standard. Pictogram for motorcycling with the type of protector E (elbow) and level of protection; passed optional impact tests at high (T+) and low temperature (T-).

Areas of Use

E for Elbow, S for Shoulder, H for Hip, K for Knee, L for Leg below knee

Product Overview

VPD SYSTEM	KNEE	K3	ARTICLE	AREA	SIZE	LEVEL
	ELBOW	E3		E	B	2
	HIP	H3		H	A	1
VPD AIR	KNEE	K2		K	A	1
	ELBOW	E2		E	B	1
	KNEE	K1		K	B	2
VPD 2.0	LONG KNEE	LK1		K+L	B	2
	ELBOW	E1		E	B	2
	SHOULDER	S1		S	B	2
	HIP	H1		H	B	2
	SHINS	L1		L	B	1

Protection level

The protective piece in this product have been tested and certified according to the European Standard EN1621-1:2012. The table below shows the permitted residual force values for the two levels of protection according to the standard.

LEVEL*	TOTAL		INDIVIDUAL		INDIVIDUAL	
	AVERAGE	VALUE	VALUE	AREA	VALUES	AREA B+C
1	≤	35 kN	≤	35 kN	≤	50 kN
2	≤	20 kN	≤	20 kN	≤	30 kN

*The standard refers to two levels of protection. Level 2 offers greater performance.

Supplier

POC Sweden AB, Nackagatan 4, 116 41 Stockholm, Sweden.

Instructions for use

1. Make sure you have chosen the right size. To function properly, the body parts that require protection must be completely covered. See updated size guide and recommendations on www.pocsports.com
2. Place the protector as close to your body as possible
3. Adjust the straps so that the protector is held firmly in place without pressing, pinching or chafing.

4. Put on the rest of your clothes and check that the protector feels comfortable under your clothing and allows freedom of movement.

Safety note

The protective effect of the protectors may be reduced by temperatures lower than +0 Celsius, always keep your protector close to your body and let your body temperature keep the temperature of the protector well above this point. Do not bend the protector if left in cold temperature since the flexibility will be heavily decreased and breakage of the protective piece is possible. Always store your protectors in room temperature. The protectors must be regularly checked for visible damage, particularly after an

impact, if damaged, they should be replaced. Alterations or incorrect use may significantly reduce their protective effect.

Care

Store your protector at room temperature in a dry place. Wipe away dirt with a damp cloth and possibly a little mild liquid soap.

Warranty

POC Sweden AB warrants that this product is free of manufacturing defects in material and workmanship when it is delivered to our dealers. Unless otherwise stipulated by local law, this warranty is limited to one year from the date of purchase and is limited to the original purchaser. This warranty does not apply in the event of abuse, negligence,

carelessness or modification, or if the product is used in any way other than is intended. Nor is any attempted repair or replacement with any part or accessory other than original POC parts and products covered by the terms of this warranty. This warranty takes precedence over any other agreements or warranties, general or special, expressed or implied and no representative or person is authorized to assume liability on behalf of POC in connection with the sale or use of this product. POC makes no other expressed warranties or guarantees, except as otherwise specifically stated. POC waives all responsibility for any third party for consequences that might result from the use or handling of any POC product by any legal or natural person. Your POC Body

Armor is only intended for alpine skiing and cycling. Do not use it for any other activity, such as horse- back riding or climbing. Don't forget that no protection – not even a POC protector – will safeguard you against the risk of every possible injury. Accidents, serious injuries or death can occur even if the Body Armor is properly used. POC makes no claim that this Body Armor will eliminate all possibility of injury. Your Body Armor may be damaged by abnormal pressure, extreme heat or cold, chemical substances etc. Avoid excessive bending or twisting of your Body Armor, also during transportation & storage. It is not designed to withstand such treatment and it may provide reduced protection or break. Check the condition of the protector regularly. It should always be

replaced after a hard fall, impact or collision, or the type of damage described above. Damage that reduces protection can be invisible and difficult to detect. If you know or suspect that your protector has been damaged or exposed to extreme or abnormal forces of any kind, have it inspected by your local POC dealer. You can also bring or send it to POC for testing. Always replace your protector at even the slightest sign of damage or wear, or after its expected lifetime of 5 years.
