

Warning and Safety Information Sheet

Clothing:

Fit: Clothing must fit the user's size to minimise the risk of injury, e.g. from catching on machinery or objects. Material: Not fireproof, no UV protection. We are not responsible for any individual allergic reactions that may be caused by certain materials in the clothing. Clothing does not contain reflective elements that may reduce or eliminate visibility during activities or work at dusk or in the dark. Clothing may contain elements that may present a strangulation hazard, such as hoods, drawstrings, etc., although this list is not exhaustive. Headbands, scarves, balaclavas, etc. may present a strangulation hazard, although this is not an exhaustive list. Children and people with reduced mobility should be supervised when wearing such clothing. Avoid contact with moving parts or devices that could cause strangulation. We recommend that you check your clothing regularly for loose parts, cords or drawstrings and discontinue use of the product if necessary.

Spare Parts / Accessories Poles = Straps:

Mountaineering, trekking/hiking, cross-country skiing, trail running, Nordic walking, roller skiing/nordic blading, inline skating, skiing, cross-country skiing, ski touring and snowshoeing can be inherently risky sports, disciplines and forms of exercise. Please inform yourself of the risks involved before participating. You are responsible for your own activities and decisions. Please read and understand all accompanying instructions and warnings before using this product and familiarise yourself with the correct use and limitations for the sport you intend to practise. This product has been designed specifically for the sport for which it is intended and is not suitable for any other use. Use this product only for its intended use and only with compatible poles and pole/glove systems. Please also refer to the safety instructions in the user manuals for your poles. We recommend that you receive training in the use of this product. Failure to observe these warnings may result in serious injury or even death. Check the functionality of your straps and gloves. Also check the connections and functionality of your strap/glove system. Do not use defective straps, gloves or coupling systems. If there are any tears, abrasions, open seams or similar damage, the straps or gloves must be replaced. When selecting and adjusting the straps, make sure they are the correct size to ensure a perfect fit, the best grip and a high level of comfort. The function of the wrist strap system is only guaranteed if the straps are firmly attached to the hand. Close all buckles when wearing. Take care not to restrict blood circulation. Beware of ski edges: The edges of skis can cut into or even destroy loops, for example when carrying, holding or otherwise handling sports equipment or sharp-edged objects.

Spare Parts / Accessories Poles = Plates / Tips:

Mountaineering, trekking/hiking, cross-country skiing, trail running, Nordic walking, roller skiing/nordic blading, inline skating, skiing, cross-country skiing, ski touring and snowshoeing can be inherently risky sports, disciplines and forms of exercise. Please inform yourself of the risks involved before participating. You are responsible for your own activities and decisions. Please read and understand all accompanying instructions and warnings before using this product and familiarise yourself with the correct use and limitations for the sport you intend to practise. We recommend that you receive training in the use of this product. Failure to observe these warnings may result in serious injury or even death. Check the functionality of your poles before each use and have any damaged or defective parts replaced immediately by a specialist. Do not use damaged poles. Make sure your

poles are fully functional before and during use. Pole tips are used to provide a firm grip for sports and walking poles in the terrain. Any other use of the poles is not intended and therefore not permitted. Before using the pole tips, check that they are in perfect condition and undamaged. The functionality of the poles and tips can be impaired by dirt, wear or damage. Please note that the pole tips have sharp edges which can cause injury or even death in extreme cases.

Spare Parts / Accessories Poles = Mounting Parts / Grip Accessories / Grips / Levers / Sleeves / Glue / Tubes / Tips / Spreader Parts / Plates / Tools:

This product may only be processed and/or modified by LEKI Lenhart GmbH or one of its sales partners within the scope of the intended assembly in accordance with the operating instructions or by authorised LEKI service partners within the scope of the official LEKI assembly guidelines. All other modifications or conversions do not correspond to the intended use and can lead to risks and safety problems. We therefore strongly advise against this. Any warranty given by LEKI Lenhart GmbH will be void in the event of such improper modifications or conversions. Any claims by the user of the product caused by such modifications or conversions are excluded. Mountaineering, trekking/hiking, cross-country skiing, trail running, Nordic walking, roller skiing/nordic blading, inline skating, skiing, cross-country skiing, ski touring and snowshoeing may be inherently risky sports, disciplines and activities. Please inform yourself of the risks involved before you participate. You are responsible for your own activities and decisions. Please read and understand all accompanying instructions and warnings before using this product and familiarise yourself with the correct use and limitations for the sport you intend to practise. We recommend that you receive training in the use of this product. Failure to heed these warnings may result in serious injury or even death. Check the functionality of your poles before each use and have damaged or defective parts replaced immediately by a specialist. Do not use damaged poles.

Spare Parts / Accessories Poles = Rubber Bumpers:

Rubber bumpers can be fitted to the tips of the poles and are designed for use on tarmac. On all other surfaces such as dirt tracks, footpaths, paths with stones, roots or gravel, grass, earth, sand, etc. the grip of the rubber pads may be impaired. Caution: Ice, snow, dirt or moisture can affect the grip of the rubber buffers. Make sure that the rubber bumper model or type is designed for or compatible with your pole tip. Rubber buffers should never be used for sports that take place off-road or on uneven terrain. This includes skiing, mountaineering, trekking, cross-country skiing, ski touring, snowshoeing, etc. Please note that the tips of the poles have sharp edges and that these can cause injury, even when the rubber buffers are fitted or removed from the tips of the poles. The tight fit of the rubber buffers on the pole tips and their grip on the surface can also be affected by dirt, wear or damage. Ensure that they function properly before and during use. The use of poles on decorative floor coverings indoors and outdoors can lead to damage to the surfaces in contact with pole tips or in contact with combinations of rubber buffers and tip elements, as well as in the case of adhering dirt and foreign bodies. The manufacturer excludes any liability in this respect. Mountaineering, trekking/hiking, cross trail, trail running, Nordic walking, roller skiing/nordic blading, inline skating, skiing, cross-country skiing, ski touring and snowshoeing can naturally be high-risk sports, disciplines and forms of exercise. Please inform yourself about the associated risks before practising the sport. You are responsible for your own endeavours and decisions. Please read and understand all enclosed instructions and warnings before using this product and familiarise yourself with the correct application options and restrictions for the sport to be practised. We recommend that you receive training in the use of the product. Failure to observe these warnings can result in serious injury and,

in extreme cases, even death. Check the functionality of your poles before each use and have damaged or defective parts replaced immediately by a specialist. Defective poles must no longer be used.

Gloves = Performance:

Mountaineering, trekking/hiking, cross-country skiing, trail running, Nordic walking, roller skiing/nordic blading, inline skating, skiing, cross-country skiing, ski touring and snowshoeing and similar alpine and Nordic sports, disciplines and activities can involve inherent risks. Please make sure you understand the risks involved before you participate. You are responsible for your own activities and decisions. Please read and understand all enclosed instructions and warnings before using this product and familiarise yourself with the correct use and limitations for the sport you are practising. This product has been designed specifically for the sport for which it is intended and is not suitable for any other use such as motorcycling or industrial safety. Use this product only for its intended use and only with compatible poles and pole and glove systems. Please also refer to the safety instructions in the user manuals for your poles. We recommend that you are trained in the use of this product. Failure to do so may result in serious injury or even death. Check your gloves for proper function. Defective gloves should not be used. If there are tears, abrasions, open seams or similar damage, the gloves must be replaced.

Before each use, check the functionality of your gloves, including the panels, padding, materials and seams, as well as the integrated TRIGGER SYSTEM or TRIGGER SHARK SYSTEM pole strap.

Gloves = All Mountain:

The processing and/or modification of this product by anyone other than LEKI Lenhart GmbH or one of its distribution partners may only be carried out as part of the intended assembly in accordance with the operating instructions or by authorised LEKI service partners in accordance with the official LEKI assembly guidelines. All other modifications or conversions are not in accordance with the intended use and can lead to risks and safety problems. We therefore strongly advise against this. Any warranty given by LEKI Lenhart GmbH will be void in the event of such improper modifications or conversions. Any claims by the user of the product caused by such modifications or conversions are excluded. Mountaineering, trekking/hiking, cross-country skiing, trail running, Nordic walking, roller skiing/nordic blading, inline skating, skiing, cross-country skiing, ski touring and snowshoeing may be inherently risky sports, disciplines and activities. Please inform yourself of the risks involved before you participate. You are responsible for your own activities and decisions. Please read and understand all accompanying instructions and warnings before using this product and familiarise yourself with the correct use and limitations for the sport you are practising. We recommend that you receive training in the use of this product. Failure to heed these warnings may result in serious injury or even death. Check the functionality of your poles before each use and have any damaged or defective parts replaced immediately by a specialist. Do not use damaged poles.

Protectors = Protector Accessories:

The processing and/or modification of this product by anyone other than LEKI Lenhart GmbH or one of its distribution partners may only be carried out as part of the intended assembly in accordance with the operating instructions or by authorised LEKI service partners within the framework of the

official LEKI assembly guidelines. All other modifications or conversions are not in accordance with the intended use and can lead to risks and safety problems. We therefore strongly advise against this. Any warranty given by LEKI Lenhart GmbH will be void in the event of such improper modifications or conversions. Any claims by the user of the product caused by such modifications or conversions are excluded. Mountaineering, trekking/hiking, cross-country skiing, trail running, Nordic walking, roller skiing/nordic blading, inline skating, skiing, cross-country skiing, ski touring and snowshoeing can, by their nature, be high-risk sports, disciplines and activities, although this is not an exhaustive list. Please inform yourself of the risks involved before participating. You are responsible for your own activities and decisions. Please read and understand all accompanying instructions and warnings before using this product and familiarise yourself with the correct use and limitations for the sport you are practising. We recommend that you receive training in the use of this product. Failure to heed these warnings may result in serious injury or even death. Check the functionality of your poles before each use and have any damaged or defective parts replaced immediately by a specialist. Do not use damaged poles.

Protectors = Forearm Protectors

To ensure adequate protection, the shin guard and forearm protectors must be firmly attached to the extremities. This product is designed to protect the extremities from low force contact with the FIS standard race gates and slalom poles placed along the course. However, in alpine skiing, due to the high speed of the skier, it is not possible to rule out all possible incidents and accidents that could have an impact on the protectors and/or the human body. It is recommended not to use the protectors for more than three years after purchase, as the materials can change their mechanical properties over time and reduce the protective effect. Before and after use, the protectors should not be exposed to sunlight or other sources of light or heat. Only water and non-aggressive soap should be used for external cleaning; solvents, petrol, lubricants or other chemical solvents should not come into contact with the protectors as they may affect the structure and functionality of the protectors.

Protectors = Protectors Accessories / Shin guards:

To ensure adequate protection, the shin guard and forearm protector must be firmly attached to the extremities. This product is designed to protect the extremities from low force contact that may be caused by the FIS standard race gates and slalom poles placed along the course. However, in alpine skiing, due to the high speed of the skier, it is not possible to rule out all possible incidents and accidents that could affect the protectors and/or the human body. Once purchased, it is recommended not to use the pads for more than three years, as the materials can change their mechanical properties over time and reduce the protective effect. Before and after each use, the protectors should not be exposed to sunlight or other sources of light or heat. Only water and non-aggressive soap should be used for external cleaning; solvents, petrol, lubricants or other chemical solvents should not come into contact with the protectors as they may affect their structure and function. Shin guard: Protector K: protector for knee and shin (proximal); Type A: PS04PICC/PS18: for small protectors; Type B: PS04GR: for large protectors. Alpine skiing shin guards comply with the provisions of EU 2016/425 on personal protective equipment for the intended use and have been tested in accordance with the requirements for Category II PPE. The shin guards have been designed according to the UNI EN 1621-1 standard.

Protectors = Impact Protectors:

To ensure adequate protection, the impact protector must be securely attached to the poles. This product is designed to provide protection against low force contact from the FIS standard race gates and slalom poles placed along the course. However, in alpine racing, due to the high speed of the skier, it is not possible to rule out all possible incidents and accidents that may affect the impact protector and/or the human body. Once purchased, it is recommended not to use the protectors for more than three years, as the materials change their mechanical properties over time, which can reduce the protective effect. Before and after each use, the protectors should not be exposed to sunlight or other sources of light or heat. Only water and non-aggressive soap should be used for external cleaning; solvents, petrol, lubricants or other chemical solvents must not come into contact with the protectors, as these may affect their structure and functionality. The Impact Protection for Alpine Skiing complies with the provisions of EU 2016/425 on Personal Protective Equipment for the intended use and has been tested in accordance with the requirements for Category II PPE.

Poles = Cross-Country Skiing / Alpine Skiing / Touring:

Mountaineering, trekking/hiking, cross-country skiing, trail running, Nordic walking, roller skiing/nordic blading, inline skating, skiing, cross-country skiing, ski touring, and snowshoeing can be inherently risky sports, disciplines, and forms of exercise. Please be aware of the risks involved before you participate. You are responsible for your own actions and decisions. Please read and understand all enclosed instructions and warnings before using this product and familiarize yourself with the proper use and limitations for the sport you are practicing. We recommend that you receive training in the use of this product. Failure to heed these warnings can result in serious injury or even death. Check the functionality of your poles before each use and have damaged or defective parts replaced immediately by a specialist. Do not use defective poles. Also, make sure the adjustment system remains closed and properly adjusted during use. Please note that the tips of the poles are extremely sharp and can cause injury or death in any situation. Sand, mud, dirt, dust, and grime, including but not limited to, may impair the function of the poles.

Do not use the pole(s) as a walking aid according to DIN EN 1985.

Poles = Cross-Trail / Mountaineering / Nordic Walking / Trail Running / Trekking:

Mountaineering, trekking/hiking, cross-country skiing, trail running, Nordic walking, roller skiing/nordic blading, inline skating, skiing, cross-country skiing, ski touring and snowshoeing can be inherently risky sports, disciplines and forms of exercise. Please inform yourself of the risks involved before you participate. You are responsible for your own activities and decisions. Please read and understand all accompanying instructions and warnings before using this product and familiarise yourself with the correct use and limitations for the sport you are practising. We recommend that you receive training in the use of this product. Failure to heed these warnings may result in serious injury or even death. Check the functionality of your poles before each use and have any damaged or defective parts replaced immediately by a specialist. Do not use damaged poles. Ensure that the adjustment system remains closed and correctly adjusted during use. Please note that the tips of the poles are extremely sharp and can cause injury or death in any situation. Sand, mud, dirt, dust and grime may affect the function of the poles, but this is not an exhaustive list.

Do not use the pole(s) as a walking aid in accordance with DIN EN 1985. Poles intended exclusively for trekking, cross-country skiing, trail running and Nordic walking must not be used for skiing.

Note on use: The product is weight-optimised and designed for competition use. It requires special skill and care and is not designed for everyday use. For everyday training, we recommend other poles in our range that are optimised for extra durability. We recommend that you use this pole for trail running only on safe paths and not in exposed terrain, i.e. alpine and fall hazard mountaineering, snow, ice or glaciers. Special design - does not conform to DIN 79016.

Poles = Trekking:

Mountaineering, trekking/hiking, cross-country skiing, trail running, Nordic walking, roller skiing/nordic blading, inline skating, skiing, cross-country skiing, ski touring and snowshoeing can be inherently risky sports, disciplines and activities. Please inform yourself of the risks involved before you participate. You are responsible for your own activities and decisions. Please read and understand all accompanying instructions and warnings before using this product and familiarise yourself with the correct use and limitations for the sport you are practising. We recommend that you receive training in the use of this product. Failure to heed these warnings may result in serious injury or even death. Check the functionality of your poles before each use and have any damaged or defective parts replaced immediately by a specialist. Do not use damaged poles. Ensure that the adjustment system remains closed and correctly adjusted during use. Please note that the tips of the poles are extremely sharp and can cause injury or death in any situation. Sand, mud, dirt, dust and grime, although not an exhaustive list, may affect the performance of the poles.

Do not use the pole(s) as a walking aid according to DIN EN 1985. Poles designed for trekking, cross-country skiing, trail running and Nordic walking must not be used for skiing.

Note on use: The product is weight-optimised and designed for experienced mountaineers. It should be used skilfully and carefully. The product is expressly not designed for use in skiing or ski mountaineering and is not protected against impacts from ski edges.

Poles = Ski Rollers:

Mountaineering, trekking/hiking, cross-country skiing, trail running, Nordic walking, roller skiing/nordic blading, inline skating, skiing, cross-country skiing, ski touring and snowshoeing can be inherently risky sports, disciplines and activities. Please inform yourself of the risks involved before you participate. You are responsible for your own activities and decisions. Please read and understand all accompanying instructions and warnings before using this product and familiarise yourself with the correct use and limitations for the sport you are practising. We recommend that you receive training in the use of this product. Failure to heed these warnings may result in serious injury or even death. Check the functionality of your poles before each use and have any damaged or defective parts replaced immediately by a specialist. Do not use defective poles. Ensure that the adjustment system remains closed and correctly adjusted during use. Please note that the tips of the poles are extremely sharp and can cause injury or death in any situation. Sand, mud, dirt, dust and grime, although not an exhaustive list, can affect the function of the poles.

Wear full protective equipment for roller skiing/nordic blading, consisting of helmet, goggles, gloves, elbow and knee pads, although this is not an exhaustive list. Skate with foresight, be considerate of others and anticipate their mistakes. The rules of the road also apply to Nordic Bladers. Control your speed. Pedestrians have priority.

Bags:

The processing and/or modification of this product by anyone other than LEKI Lenhart GmbH or one of its distribution partners may only be carried out within the framework of the intended assembly in accordance with the operating instructions or by authorised LEKI service partners within the framework of the official LEKI assembly guidelines. All other modifications or conversions are not in accordance with the intended use and can lead to risks and safety problems. We therefore strongly advise against this. In the event of such improper modifications or conversions, any warranty given by LEKI Lenhart GmbH will become null and void. Any claims by the user of the product resulting from such modifications or conversions are excluded. Mountaineering, trekking/hiking, cross-country skiing, trail running, Nordic walking, roller skiing/nordic blading, inline skating, skiing, cross-country skiing, ski touring and snowshoeing can be inherently risky sports, disciplines and forms of exercise. Please inform yourself of the risks involved before you participate. You are responsible for your own activities and decisions. Please read and understand all enclosed instructions and warnings before using this product and familiarise yourself with the correct applications and restrictions for the sport you are practising. We recommend that you receive training in the use of this product. Failure to heed these warnings may result in serious injury or even death. Check the functionality of your poles before each use and have any damaged or defective parts replaced immediately by a specialist. Do not use damaged poles.
